AQUA FORCE

THE PROFESSIONALS CHOICE

Aquaforce Premium Soil Wetter overcomes water repellence and saves water

- Premium, highly penetrating non-ionic soil surfactant
- For extreme situations, in particular severely hydrophobic soils
- Assists in breaking down hydrophobic build-up, water retention and rapid penetration
- Good even soil wetting qualities
- Environmentally friendly and excellent in extreme conditions
- Reduces loss from evaporation & run-off
- Enhances moisture uptake and retention around the root zone, improving plant health and vigour
- Long lasting
- Easy hose on application that will continue to re-wet" soil for up to 3 months
- 2 litre container treats 200m² of turf

When used in combination with Bi-Agra™ it helps keep your lawn healthy and green during Western Australia's summer heat and permanent water efficiency measures.

Apply Aqua Force and then follow up with an application of Bi-Agra™ soil moisture retainer, a few days later. Aquaforce should be applied at least three times a year to assist in keeping your turf and garden alive and healthy. Apply end of September, late December and again in February annually for best results.

Aqua Force is endorsed and highly recommended by the Turf Growers Association WA
